- Part II
 - Program Specialisation: 29 March
 - Termination analysis: 19, 26 April
 - Abstract interpretation: 3, 10 , 17 May

About the exam

The exam consists of exercises (closed book).

A typical exam consists of two parts, more or less corresponding to the two parts of the course. You receive both parts at the beginning of the exam. Time is limited, so it is important to properly divide your time over the different questions (and to adjust the level of detail of your answers to the available time).

After 1.5 hours you should be ready to orally explain your solutions to the problems of Part I. After another 1.5 hours, you should be ready to orally explain the problems of Part II.
